

I am writing because of the potential to lose KLOVE in my local area due to a change in the FCC. I rely on KLOVE to provide news and inspirational information from a Christian perspective that is unavailable in a majority of the FM transmitters. It provides a radio avenue for my family and children as an alternative to the destructive nature of secular music. Our country is fighting a moral decline and the loss of stations like KLOVE will only increase our moral decline because of the lack of positive influences in society. Christian radio provides a positive and moral message that our children need to balance out the perverse and negative impacting media.
